

Concept & Multinational Dimension

e-Guide CWH&S project tackles identified problems and gaps in the VET systems of 6 European countries by developing an interactive multilingual e-learning tool in health and safety signs and signals in construction industry.

The project transfers and adapts training methods, results and outcomes, incl. training materials, by using modern teaching methods and tools for effective lifelong learning. The latter include e-learning interactive multilingual modules, simulation games, interactive multiple choice test modules.

The *aim* of the project is to develop an innovative, attractive and useful training tool for acquiring key competencies in health and safety signs and signals in construction industry.

Project Objectives

Transfer and adapt industry-specific VET training methods and tools

Training of VET students, trainers/tutors and SME staff in health and safety signs and signals in construction industry

Awareness raising of the importance of health and safety signs and signals in construction industry and the related sectors

This project has been funded with support from the European Commission. This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information

The Project Consortium

Kick-off Meeting,
13-16 November 2013, Ruse,
Bulgaria

MYCCI Bulgaria (Promoter) - focused on linking vocational education and training with the actual market needs and contemporary industrial developments, thus, contributing to bringing VET and the world of business closed together.

University of Forestry (Bulgaria) - provides training in forestry, woodworking and furniture production, engineering design, ecology and environmental protection, industrial management in forestry and forest industry, landscape architecture.

MAKRO Consult (Turkey) - a private international consulting company with over 25 years of experience in providing training solutions for personal development and organizational capacity building.

BEST Institute (Austria) - independent vocational institute providing adult education, vocational qualification, guidance of unemployed people and training of key qualifications for re-integration into the labour market.

PARAGON
EUROPE

"REALISING EXCELLENCE"

Paragon Europe (Malta) - focused on vocational training, research and project management.

Springboard Opportunities (Northern Ireland, UK) - has been at the forefront of learning materials development and supporting people development through understanding of the workplace and development of work skills.

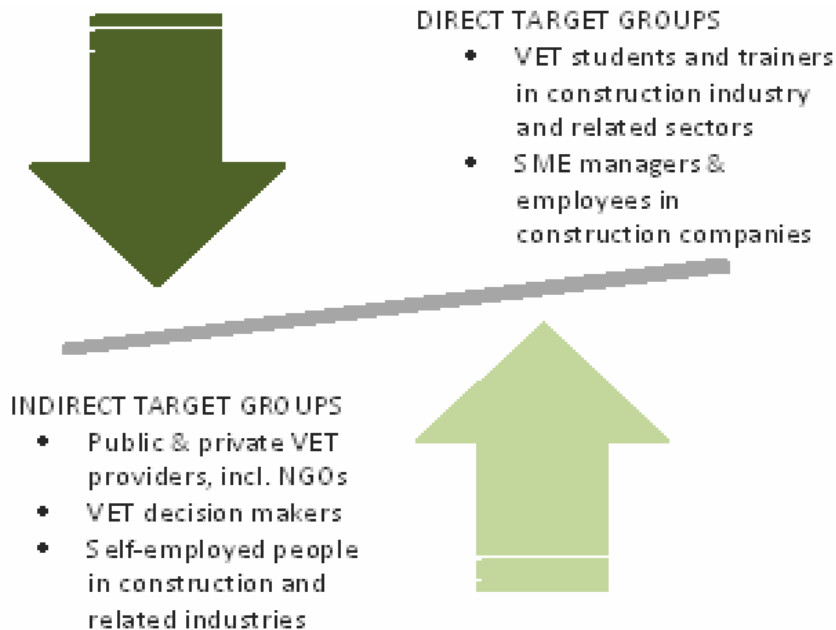

CEEI—Burgos (Spain) - business and innovation centre offering services in entrepreneurship, training and e-learning, promotion and development of innovative SMEs, etc.

The project partners are selected on the grounds of their expertise in VET activities, awareness of market developments and close links both with VET institutions and SMEs

Signing of the partnership contract, Reneta Raynova (MYCCI Bulgaria) and Prof. Veselin Brezin (University of Forestry, BG) and Tanya Pancheva (University of Forestry, BG)

Target Groups

The aim of the e-Guide CWH&S project is to develop an innovative, attractive and useful training tool for acquiring key competencies in health and safety signs and signals in construction industry.

Outcomes & Results

The key tangible results include **an interactive multilingual e-learning tool** in health and safety signs and signals in construction industry and related sectors and **methodology** for the purposes of e-learning in construction workplace health and safety.

The intangible results include the achieved **novelty** of the training tools and methods in VET, **attractiveness** of the VET systems and practices in the partner countries, **new skills and key competencies** of the target groups developed towards the new job requirements in construction industry.

Second Partner Meeting, 3-4 April 2014, Burgos, Spain

Progress

**OVERVIEW
